

2021 Catalog

Our Mission

HempWood® aims to be a catalyst for a wave of innovation consumed by the idea that our cultural shift towards a more sustainable way of living is no longer desired but required.

By using the algorithm of a tree, we have reverse engineered the natural growth cycle of plant-based materials and utilized bio-mimicry to transform hemp fibers and protein based bonding agents into a viable wood substitute that is 100 times faster to grow and 20% stronger than oak.

With all typical wood applications being the core function of HempWood, the possibilities are nearly endless.

Lumber

Grain Variation

Plain Sawn

Rift Sawn

- No added formaldehyde
- Eco-friendly adhesives
- Made with sustainable USA hemp
- Made in USA
- Patented product

Flooring Sample \$10

Our Story

Greg Wilson, founder and owner, has over 20 years of experience in the building industry. In 2003, Wilson began his journey with flooring. After obtaining 14 years of knowledge in the bamboo flooring industry, Wilson started HempWood®.

HempWood® began manufacturing on August 26, 2019. HempWood® is located in Murray, Ky. With the assistance of Murray State University and the Huston School of Agriculture, HempWood has produced over 5,000 hemp blocks within a year and an half of production.

HempWood® looks forward to what the future holds. We also appreciate all the support we have received over the years.
